

a1 -- This is a Continuation-In-Part of application Serial No. 08/846,108, filed April 25, 1997, now U.S. Patent No. 6,278,884, which is incorporated in this application in full by this reference. --

**IN THE CLAIMS:**

Add the following new claims:

a2 52 (New) A mobile entertainment and communication device for communicating with remotely located telephones, comprising:

- a cellphone in a portable housing of a size and weight for being handheld by a person for placing and receiving person-to-person telephone calls to and from remotely located telephones, said cellphone having a microphone;
- a battery in the housing for supplying electrical power to said cellphone;
- means for selectively activating said microphone for capturing sounds within a range of said housing;
- a memory operatively connected to said cellphone and said battery for selectively storing at least one of the sounds captured by said microphone and the sounds received from the remotely located telephone;
- means for activating said cellphone for wirelessly communicating with a remotely located telephone and, when said cellphone and the remotely located telephone are telephonically connected, then selectively either causing the currently captured sounds or the stored sounds to be transmitted by said cellphone to the remotely located telephone or
